

Case Study

Microsoft Dynamics AX Implementation

The Challenge

In reviewing their business and IT strategy, a large telecommunications company with offices across 18 countries decided to implement a single instance of Microsoft Dynamics™ AX software. The intent was to reduce operational complexity and improve efficiency. Once they determined the scope of the project, they sought a partner with a global reach to support them in their initiative. They engaged Oxford Global Resources to assist with various aspects of the project and help keep them on time and within budget.

The Solution

Oxford was able to quickly provide resources across multiple countries, overcoming language and time zone barriers. We supported each phase of the European deployment over the course of the project. Our senior consultants provided expertise in the following areas:

- Finance
- Project Accounting
- Purchasing
- Sales
- Supply Chain
- Production
- Invoicing

We also supplied country-specific project managers in Finland, Denmark, Norway, Sweden, the UK, the Netherlands, Italy, the United States, United Arab Emirates, and Australia.

Our client was able to successfully implement a consistent instance of Microsoft Dynamics AX across multiple countries.

The Result

Our client was able to successfully implement a consistent instance of Microsoft Dynamics AX across multiple countries. Thanks to our rapid response time, we were able to keep our client's project scope on track. We also contributed a deep knowledge of the systems and business processes needed to bring about the desired positive outcomes. Since then, we have continued to provide our client with Microsoft Dynamics experts to support their ongoing needs.
